

How to Change your Password

Last Updated Monday, 08 January 2007

Remember to change your password every 3 months!

To change your CIS password:

1. Login to any of the UNIX machines and at the prompt type passwd
2. You will be asked for your old password. Type in your old password at the prompt and hit return.
3. You will then be prompted for a new password. You will be prompted to enter it again for confirmation. Please follow good practice when choosing a password. Things like your birthday or your puppies name really aren't acceptable and put you at major risk. Try to use a mixture of upper and lower case letters, as well as numbers.

It should then tell you that you password has been successfully changed.
